

Secure. Administer. Protect.

gPanel[®] is Promveo's exclusive Google Workspace management and reporting solution, providing organizations and their Google administrators with all the tools they need to effectively manage users in their domain while safeguarding sensitive company data.

Not only does gPanel[®] give you the ability to take precise administrative action, but it also allows you to oversee files, email communications, and other internal processes within your company.

gPanel[®] is more than just a one-size-fits-all Google Workspace service — it's a constantly evolving solution and the perfect compliment to Google Admin Console.

The image displays three overlapping screenshots of the gPanel web interface. The leftmost screenshot shows the 'Administering' dashboard with a sidebar menu and a main content area for 'Process Details'. The middle screenshot shows the 'Reports' section with a table of reports and a 'Report Details' panel. The rightmost screenshot shows the 'Drive Explorer' interface with a list of files and folders.

The Powerful Capabilities of gPanel[®]

User & Data Management

Create, edit, add, and delete users or groups in bulk or individually.

Reporting

Schedule or manually run up to 70 reports total for documents, groups, account activity, and much more.

Role Granularity

Create specific role-based access to gPanel for any user without giving them access to the Google Admin Console.

Automation

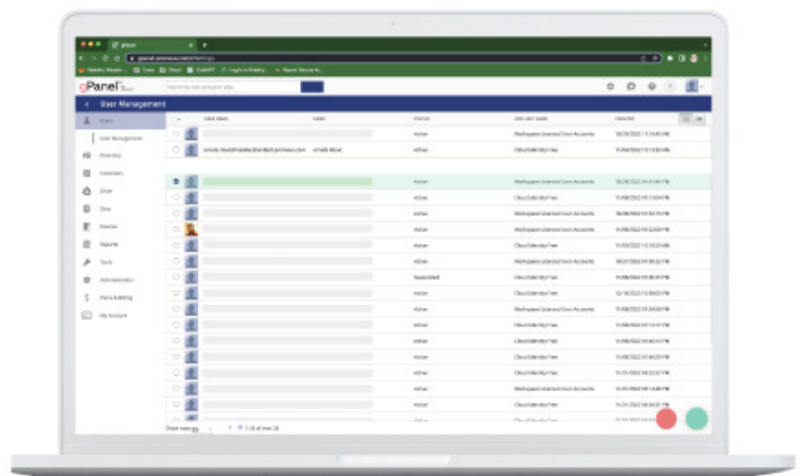

Leverage bulk operations and run customized policies to streamline administrative workflows.

Signature Templates

Apply signature for anyone in your organization, eliminating the need to individually rely on users to modify their signature settings.

Contact Sync

Sync a group of contacts from one user to another user(s) to keep groups of users updated on necessary contacts and allow target users to make edits and changes.
